RECORD 240

Flexible machining center with high versatility

RECORD 240 is a new machining center available in a wide range of configurations, dedicated to a vast range of machining operations and capable of dealing with all machining requirements.

The greater skill to modular and, depending on machining requirements, may consist:

- Developed by SCM, this electro-spindle is fitted with a VHSR 3 F quick-release taper for maximum rigidity and precision during operations and has a power of up to 16 kW at 6000 rpm to guarantee maximum performance, especially with large tools.
- The new RAPID 12 tool changer means that all the tools normally required for the majority of the components are available on the machine.
- With the TR 1, TR 2, TR 3 additional tool changes, more than 40 tools are

Company Profile

Today, SCM Group is a world leader in the woodworking machinery and system sector. Two million machines installed and operating in 120 countries, 12 factories, and 70% of the production in export.

The origins of SCM Group, date back to 1932 when the late father, Nicola Geronzi and Luciano Anelli, established the first professional machine and an iron factory in 1932. The electric saw blade and the woodworking machinery sector. The first multipurpose machine engineered by the young Giuseppe Geronzi, which was produced on industrial scale for the first time, was soon successfully distributed worldwide under the trade name *Automatica*.

The quality of the machinery, offered at advantageous prices because produced on industrial scale, played a fundamental role in organizing important distribution channels and setting up a network of distributors and agents all over the world, first in Europe and finally in 120 countries worldwide.

Together with the strengthening of marketing operations, the Group decided to implement its line of products. In the 1970s the efforts were directed towards the construction of semi-automatic and fully automatic Customer operation, an overall corporate policy, of great primary importance in anticipating the solution to the client's problems and, from the 1980s, electronics became an integral part of the product. Joint ventures and local branches allow a fast and efficient answer to service and after-sales assistance.

The Strength of a Large Group of Specialists

2,000 employees, 12 factories and a export level which accounts for 70% of its production.

SCM GROUP operates through a number of highly specialized brands:

SCM the founder company which produces solid wood and panel processing machinery for the medium and large industries; **MORBIDELLI** being machine and systems; **MAHROS** CNC router and machining centres; **ROUTECH** ENGINEERING, integrated systems for reworking; **DMC** handling machines; **SEMIPRO** workshop reworking machines. The production process is completely integrated with 2 floors for cast iron, a dedicated and highly automated factory for the production of electric and electronic components, a study & research division and a vocational training centre.

scm group in the world

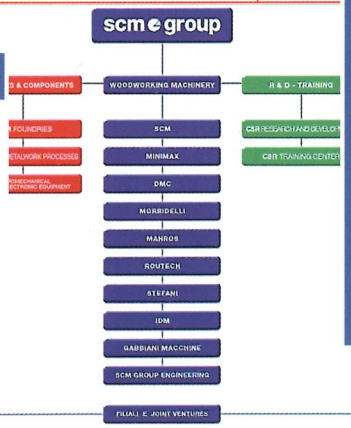

Close to our customers in 120 countries

SCM Group products are distributed in 120 countries and throughout the world by agents and dealers backed up by subsidiaries currently operating in Germany, France, Spain, Great Britain, Italy, Switzerland, Romania, Bulgaria, Austria, Canada, USA, Singapore, Hong Kong, and Japan (with 4 sales offices in China) and several.

Through this distribution network, comprising 350 dealers and agents with over 1,200 sales outlets, the SCM Group is able to offer its clientele a complete before and after-sale service.

Please contact us at our subsidiaries or directly at our companies. We will be pleased to give you all the information required on our products and sales points nearest to you.

E-mail: scm@scmgroup.com

In the mid-1980s, SCM Group, with the acquisition of companies already well consolidated in the production of panel machinery, created the conditions to give itself an organic form and a fully integrated system. Between 1987 and 1992, six companies leaders in their respective market sectors, became part of SCM Group. The acquisition of the Italian company, with the Faculty of Engineering and Agriculture of the University of Bologna.

SCM Group is a group and determined to complete its tasks on the economic scenario of the third Millennium.
