

# High productivity panel sizing machines and systems

# Gibben

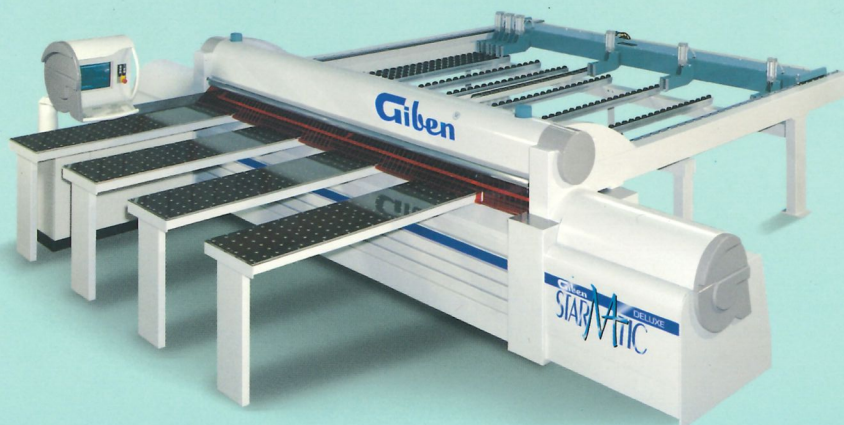

Having focused its efforts totally on panel sizing for more than five decades, Giben has accumulated an immense amount of knowledge and expertise. This enables the company to provide design and solutions which anticipate customer needs rather than simply responding to current demand. Today Giben is an industrial group strong of four manufacturing plants and nine distribution subsidiaries. Giben Impianti, Giben America, Giben Australia, Giben Canada, Giben do Brasil, Giben Deutschland, Giben de España, Giben Scandinavia, Giben UK, testify the commitment of our company to those demanding customers that place their trust in Giben's products, service, and support.

## GIBEN PANEL SIZING MACHINES

### STARMATIC DELUXE

The ideal panel cutter for the carpenters, joiners, small furniture factories. Automatic pusher with electronic programming, pneumatic grippers to clamp the material during the sizing process.

### PRISMATIC SP

Ideal for carpenters, joiners and also for the small to medium sized furniture industries as well as for the panel service companies. Automatic pusher with electronic programming, pneumatic grippers for the material clamping during the sizing process.

### PRISMATIC SPT

100  
115  
132  
mm

~20 m<sup>3</sup>

Ideal for carpenters, joiners and also for the small to medium sized furniture industries as well as for the panel service companies. Automatic pusher with electronic programming, pneumatic grippers for the material clamping during the sizing process. Complete with automatic infeed from lift table.

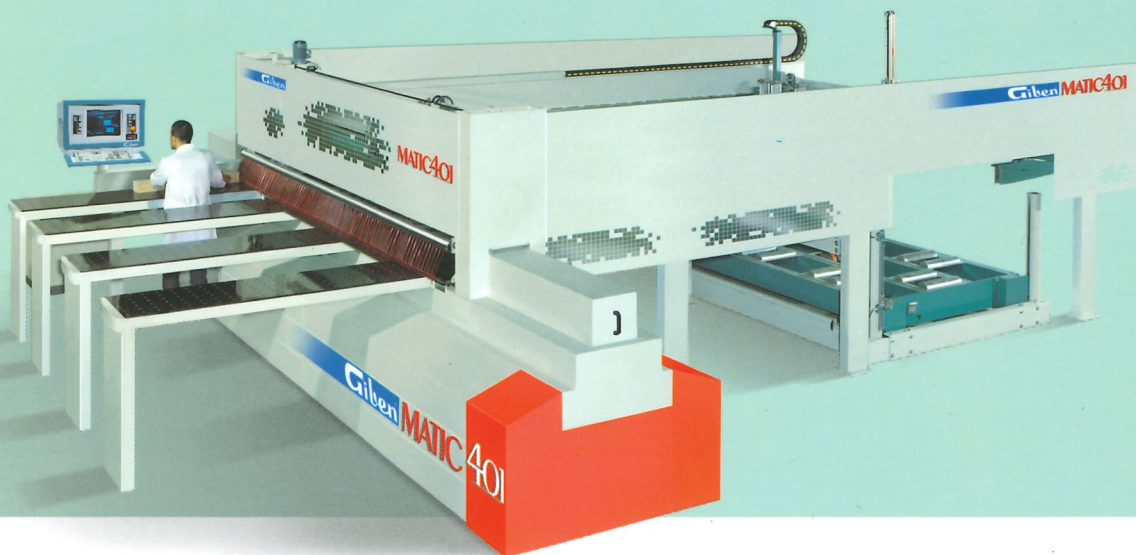

### MATIC 401 SPT

170  
mm

~28 m<sup>3</sup>

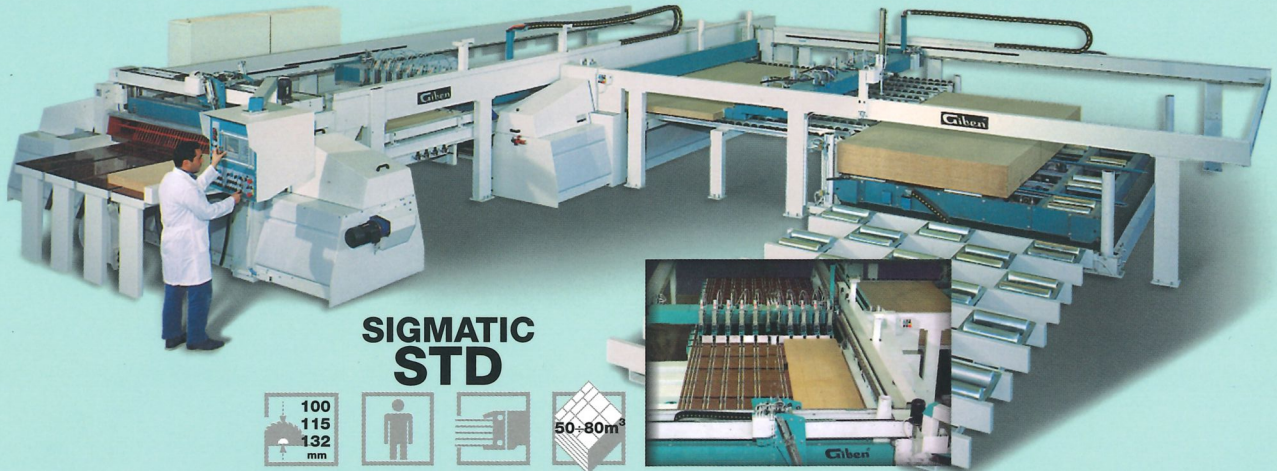

Ideal for carpenters, joiners and also for the medium to large sized furniture industries as well as for the panel service companies. Automatic pusher with electronic programming, pneumatic grippers for the material clamping during the sizing process. Complete with automatic infeed from lift table.

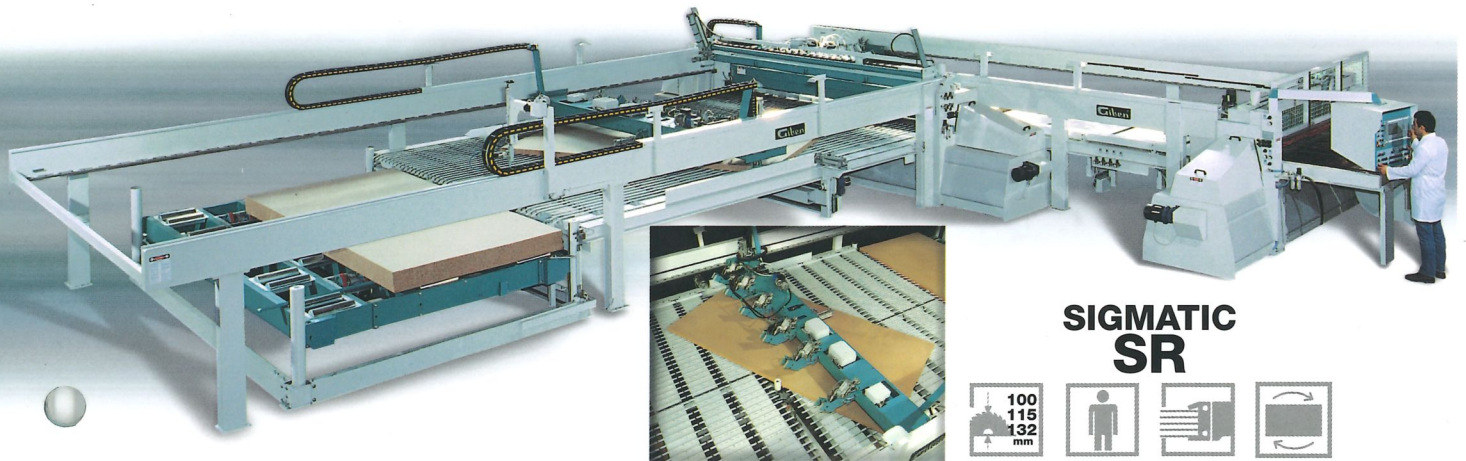

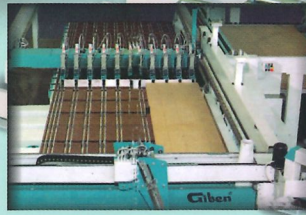

# GIBEN CUT-TO-SIZE-SYSTEMS

## SIGMATIC

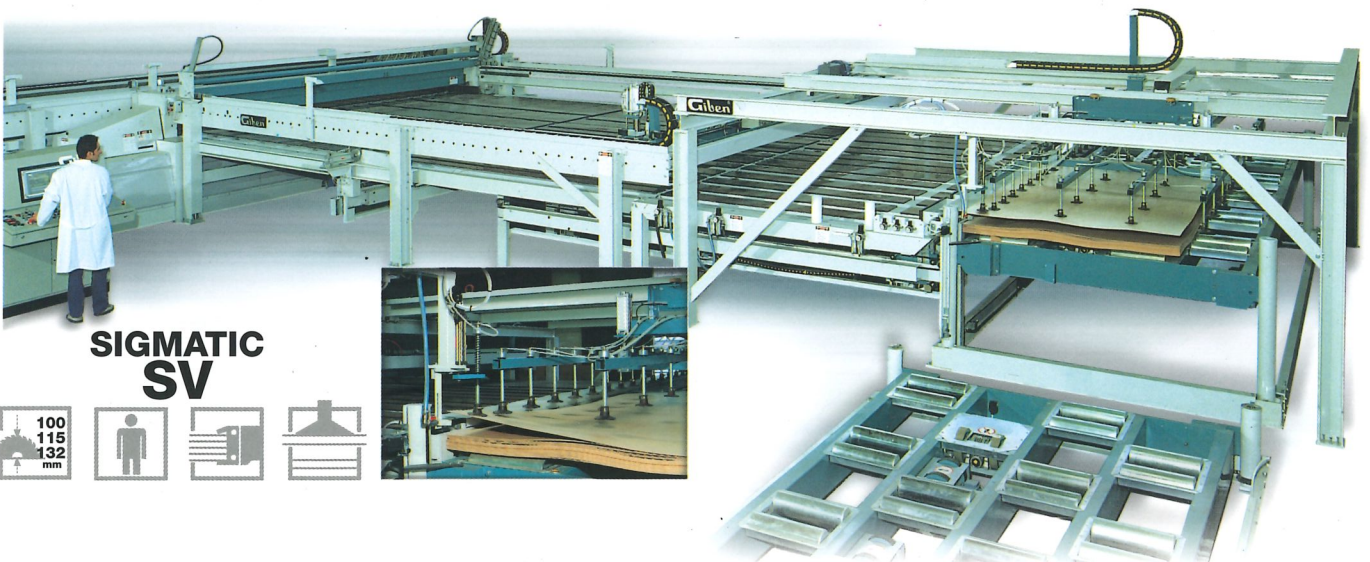

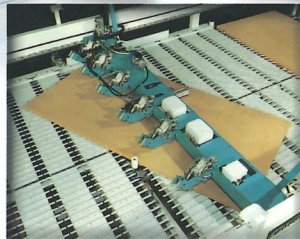

Angular system for mass production for the medium sized furniture industry and panel service companies. Fully automatic, continuous cycle for execution of length and cross cuts. These systems are available also with one system to rotate of 90° the stack, of boards in order to execute head cuts with the rip machine (mod. SIGMATIC SR). The SIGMATIC SV version is equipped with vacuum loading device for the boards in-feed.

## SUPERMATIC 17-19

Angular system for mass production for the large sized furniture industry and panel service companies. Fully automatic, continuous cycle for execution of length and cross cuts. Furthermore, many groups called AUXILIARY UNITS are available. These units increase output and utilisation smoothness of the basic models 17 and 19.

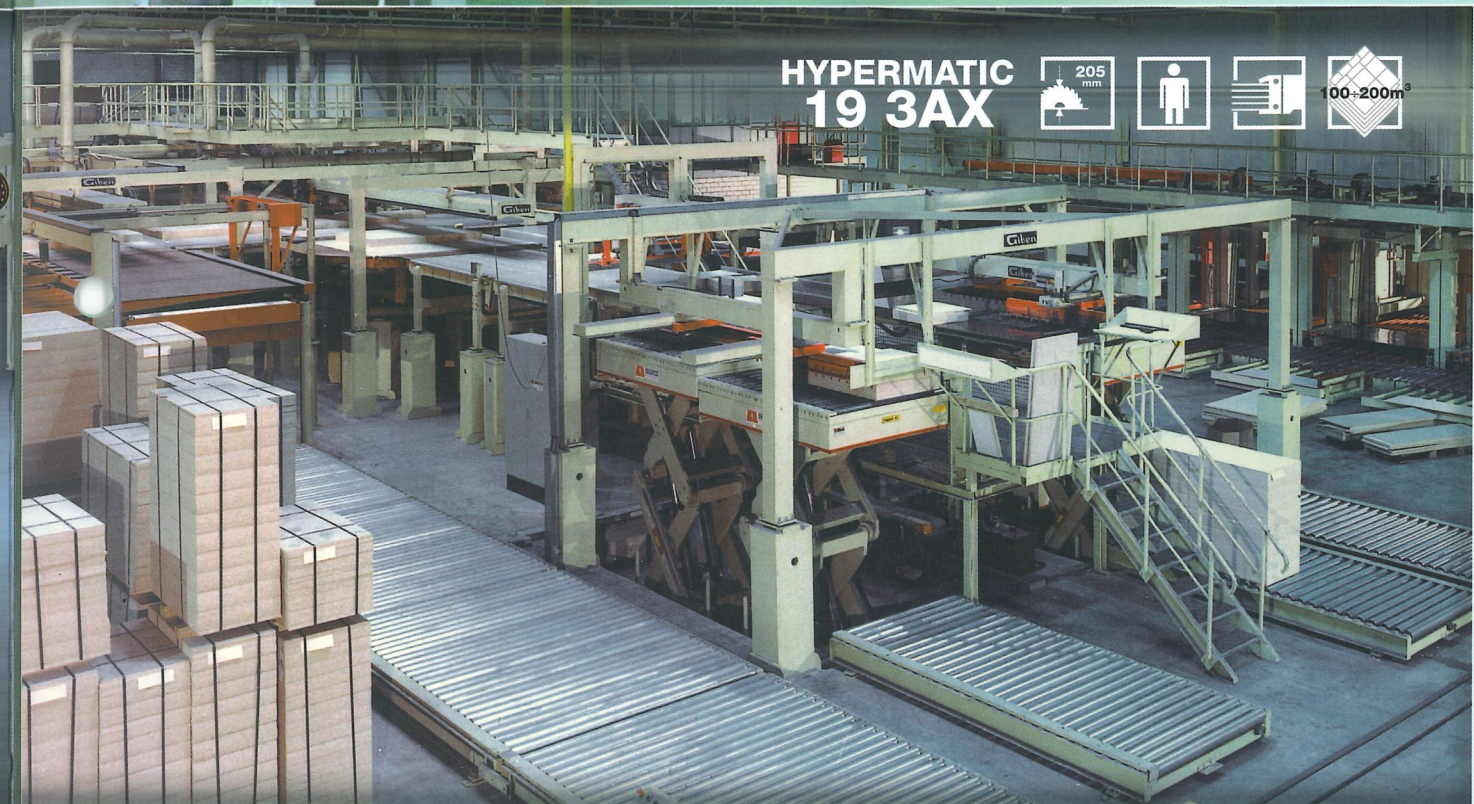

## HYPERMATIC 17-19

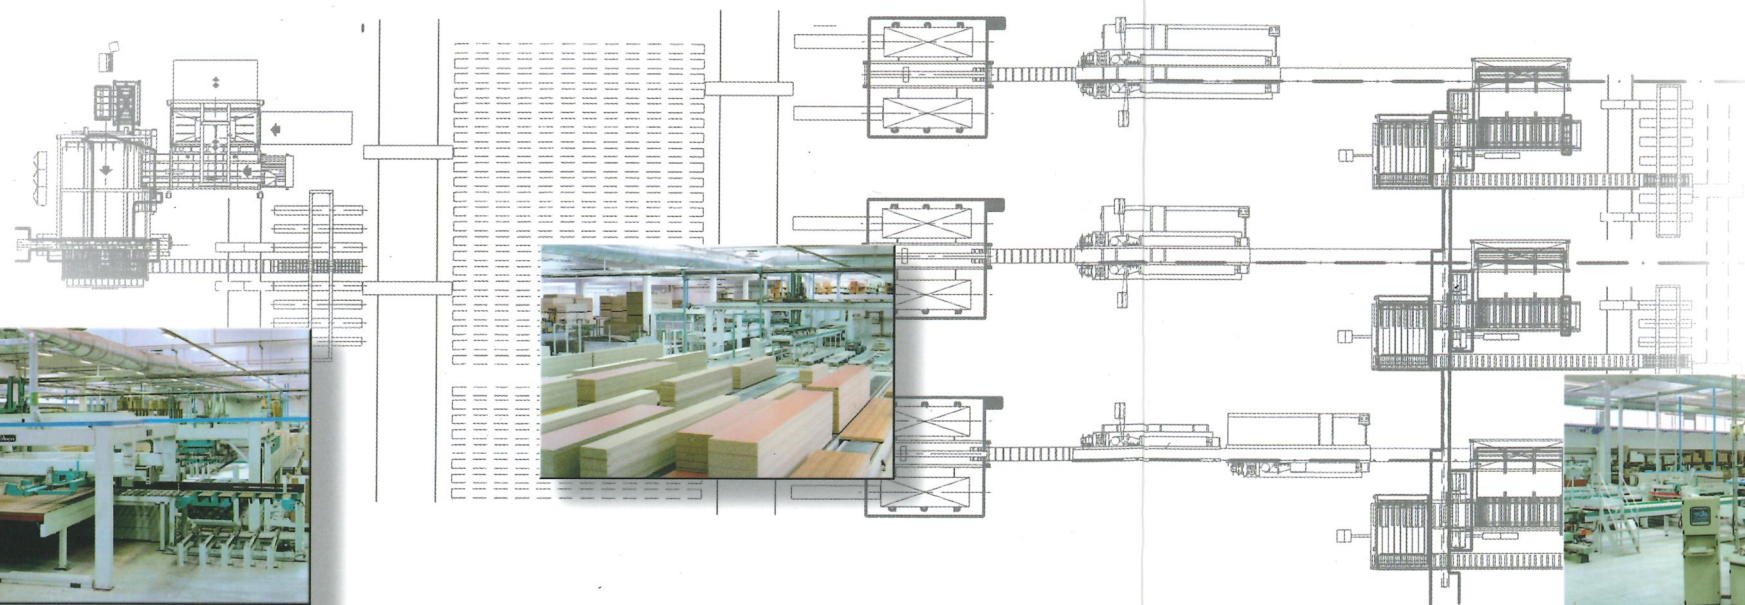

Studied for specific functions. They represent the most complete instruments currently available on the market, for very large and also diversified productions. Furthermore, many groups called AUXILIARY UNITS are available. These units increase output and utilisation smoothness of the basic models 17 and 19. Fully automatic, from loading to unloading and including stacking of panels.

**HYPERMATIC 19 3AX**    

## GIBEN ENGINEERING

GIBEN itself place at the disposal of furniture manufacturers with regard to design and individual customize solution for integrated, flexible, semi-automatic or fully automatic lines.

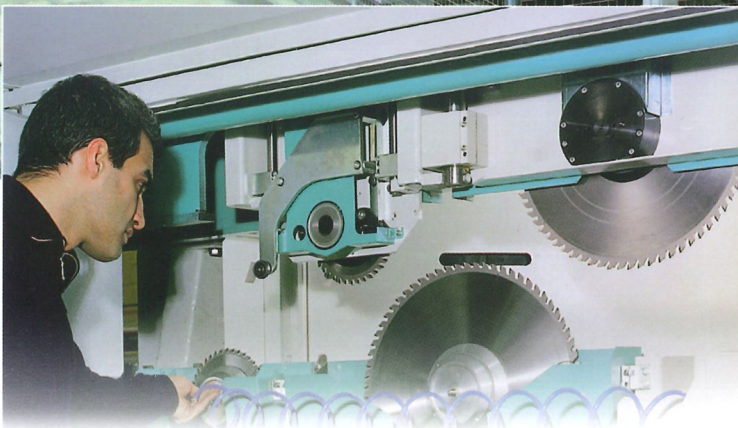

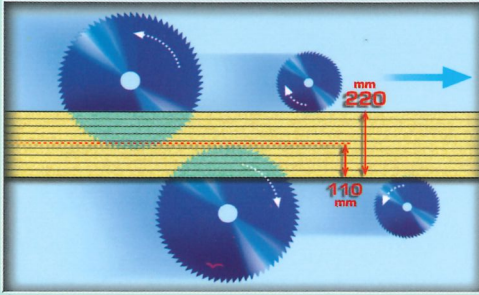

# GIBEN CUT-TO-SIZE-SYSTEMS

## TETRAMATIC

TETRAMATIC is a new panel saw concept for high-capacity angular systems and sizing lines for books 220 mm and higher.

- Two saw blades share the cutting strain and double the feed speed.
- Two scoring saws assure a perfect cut even for the top board of the book.
